2

Bend up to from the coat "hook." Put tab through slot.

side view

3

Bend tab up to secure.

side view

4

Repeat 4 more times to complete remaining hooks.

5

Bend along lower dotted line to make a 90 degree angle.

side view

6

Bend along the other dotted line, in the same direction, 90 degrees to complete the rack.
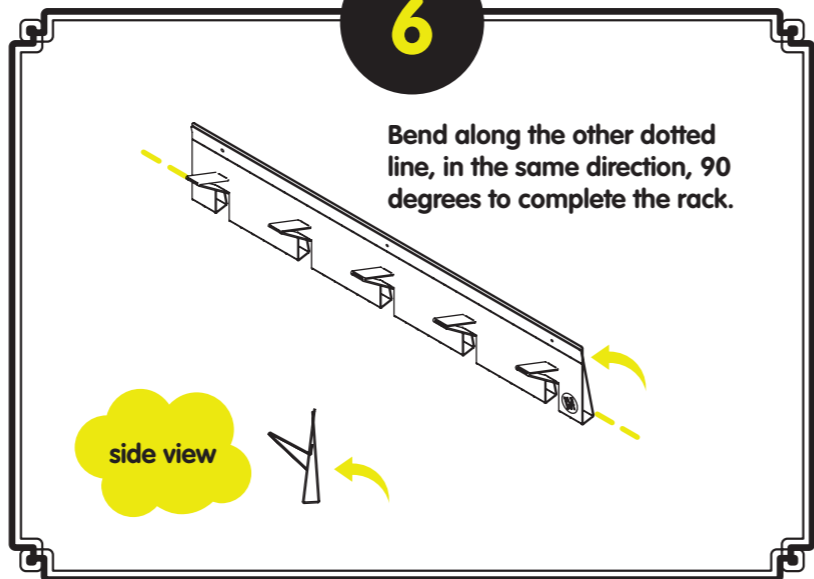

side view

7

You will need to bend the top flange slightly, along the dotted line, so it is flush with the back panel.

MOUNTING YOUR COAT RACK TO THE WALL

Position the rack where you'd like it to be and mark the center screw holes with a pencil (it is best of this is lined up with a stud in the wall. Drill a 3/16" hole and hammer the blue plastic anchor until it is flush with the wall.

Place center screw hole over the blue anchor and insert screw. Stand back to level the rack (like hanging a picture). Once level, mark the other two holes. Remove rack from wall. Drill two remaining holes, insert blue plastic anchors, and reinstall rack. Tighten screws until snug.
